

PRESS-RELEASE

Ref.: BIORIGIN SPONSORS AQUA EVENT IN ITALY

Date: January 21, 2019

Contact: Merylin Miguel (Strategic Marketing)

merylin.miguel@biorigin.net

Biorigin will be the sponsor and one of the exhibitors in the third edition of Aquafarm, an international conference and exhibition focused on technologies, products, and best practices for sustainable fish production, to be held on 13 and 14 February 2019 at the Pordenone Exhibition Center, Italy.

During the event, Biorigin will be at the **booth 5.53** and will show natural solutions for fish health, such as MacroGard, a beta 1,3/1,6 glucan product that balances natural defenses, providing a more efficient protection against the most common production challenges, resulting in higher resistance and better performance.

ActiveMOS, containing mannan oligosaccharides, contributes to the maintenance of the intestinal integrity of fish, particularly during growing stages and challenging situations, preventing the penetration of pathogens and favoring nutrient absorption. Biotide extra, RNA – source of dietary nucleotides, and HiCell, source of highly digestible proteins and nucleic acids, both essential for the efficient development of fish will also be highlighted at Biorigin's stand in the fair.

The company also invite visitors to the lecture on February 13 at 3:30 pm where **Paul J. Midtlyng**, DVM, PhD, of **Norwegian University of Life Sciences and Aquamedic AS**, will present the results of a trial carried on MacroGard showing the **Anti-inflammatory effects of β -1,3/1,6 glucan supplemented feeds in farmed salmonids**.
